Education

Dadi Institute of Engineering and Technology — Visakhapatnam, India
B.Tech in Computer Science and Engineering — *2022 – 2026*
- CGPA: 8.18/10

Technical Skills

Languages: Java, JavaScript, Python, C/C++
Web & Backend: Node.js, Express.js, React.js, HTML, CSS, REST APIs
Databases: MySQL, MongoDB
Tools: Git, GitHub, Postman, VS Code
Core Concepts: OOP, Data Structures and Algorithms, API Design

Projects

Library Management API | *Node.js, Express.js, Zod, REST APIs* — GitHub
- Built REST endpoints for managing books, members, and loans, including CRUD operations and business rules for issuing and returning books.
- Implemented request validation, centralized error handling, filtering, sorting, pagination, and Postman API tests.

Expense Tracker CLI | *Node.js, JavaScript, JSON, CSV* — GitHub
- Developed a command-line tool to record, update, filter, and delete expenses with persistent JSON storage.
- Implemented category-wise budgets, monthly summaries, date and amount sorting, and CSV export.

Calcora – Scientific Calculator | *JavaScript, HTML, CSS* — GitHub
- Built a responsive scientific calculator with expression parsing, interactive controls, and degree/radian angle modes.
- Implemented theme customization and local storage to retain user preferences.

Waste Segregation Classifier | *Python, TensorFlow, MobileNetV2, Streamlit* — GitHub
- Built an image classifier using transfer learning to categorize waste into six classes.
- Integrated Grad-CAM visual explanations and a Streamlit interface for interactive predictions.

Invoice Field Extraction System | *Python, PaddleOCR, OpenCV, Vision APIs* — GitHub
- Developed a document AI pipeline combining vision-based extraction, OCR, and computer vision to process invoice documents.
- Added rule-based validation and structured output for extracted invoice fields.

Air Quality Prediction System | *Python, Machine Learning, JavaScript* — GitHub
- Developed a machine learning application to predict Air Quality Index using environmental data, with a web interface for displaying predictions.

Internship Experience

Datavalley India Pvt. Ltd. — Remote
Full Stack Developer Intern – 120-hour program — *May – June 2024*
- Worked with HTML, CSS, Bootstrap, JavaScript, Node.js, and MongoDB to develop responsive web pages and database-integrated applications.
- Practiced frontend and backend integration and Git-based project workflows.

Certifications

Java Full Stack Development – EduSkills Academy (2026)
Google AI-ML Virtual Internship – AICTE (2024)
Developing Front-End Apps with React – IBM / edX (2024)
AWS Cloud Virtual Internship – AICTE (2023)

Hackathons & Competitions

Convolve 4.0 – IIT Guwahati; advanced to Round 2.

Kharagpur Data Science Hackathon (KDSH) 2026 – IIT Kharagpur.

National AI/ML Hackathon – Vivriti Capital.

Prayatna 2.0 – Acropolis Institute of Technology and Research.
